**1:10 SCALE ROCK CRAWLER TRUCK**

## The Updated Maverick RC Scout RC!

The new 2017 version of the Scout RC features all of the running changes that have improved and upgraded the truck since its original release, from waterproof electronics to stronger center driveshaft. Brand new to this latest edition are an all-new color scheme for the low-profile crawler body and an aluminum servo horn that provides much more powerful steering action from the 9kg steering servo.

The Maverick Scout RC rock crawler has been hugely popular among fans of crawling, becoming the basis for countless owner modifications from all-out competition machines to scale replica crawlers. We've loved seeing what Scout truck owners do with their trucks, and now you can have a new base model to start more fantastic conversions!

The Maverick Scout RC is superbly outfitted for off-road adventure, no matter where you want to go! With the extra-low 1:48 gearing thanks to its tough sealed transmission & differential and the superb traction and grip from the large tires, the Scout is a great truck for climbing, crawling and trail driving whether you want to leave it completely stock or completely customize it. The solid axle 4-link suspension is fitted with extra-long, oil-filled dampers and aluminum links give the Scout over 6 inches (14.5cm) of travel at each wheel for over 80 degrees of articulation between the front and rear axle. This lets you easily get over tall, seemingly impossible obstacles!

Finally, the powerful 9kg steering servo is now equipped with an all-new aluminum servo horn for extra steering power, letting you get around the toughest obstacles, no matter whether they're ultra-grippy dry granite rocks or a group of moss-covered tree roots.

The Maverick Scout RC is a great introduction to crawler trucks, whether it's your first RC vehicle or your tenth! It's the perfect way to get children or significant others involved in RC and joining you on the trail if you've already got a dedicated and fully outfitted crawler truck. The Scout gives drivers of all skill levels the confidence to hit the rock pile or the trail with ease for hours of RC fun!

## FEATURES

- Fully assembled 1/10 scale rock crawler truck
- Full-time 4WD shaft drivetrain
- Crystal Free 2.4Ghz Transmitter and Receiver with built-in failsafe
- 9Kg high-torque steering servo with cast aluminum servo horn
- Solid axles with locked differentials
- Over 6 inches of suspension travel at over 80 degrees articulation!
- Battery strap securely holds pack in the chassis
- 4 oil-filled rebuildable shocks with progressive springs
- Special titanium anodized shock tops
- 1:48 super low gear ratio for maximum climbing torque
- Super strong twin vertical plate chassis
- Tough efficient slider-shaft drivetrain
- Fully ball bearing-supported drivetrain
- 2.2 inch beadlock wheels
- Medium compound crawler tires offer all-round performance
- Pre-cut body with custom factory paint job
- Front and rear molded bumpers
- Ready-To-Crawl straight from the box!
